## Multi-Blade Foam Cement Blending Assembly

Brand: OFI Testing Equipment, Inc. Product Code: 124-00 Availability: Call for availability Lead Time: 90

## Description

The Multi-Blade Foam Cement Blending Container is designed to mix foam cement slurries. The stainless steel container fits on the <u>OFITE Constant Speed</u> <u>Blender</u>. Inside, instead of a single set of blades, it contains a stack of five (5) sets of blades. The extra blades introduce significantly more air into the slurry as it mixes, creating a foam instead of the standard liquid slurry.
